

MOLD CHUTES & SHIELDS™

IPS Mold Chutes & Shields™ stop your moldings from scattering randomly in the “drop zone”. They ensure your parts land on your conveyor or in your packing case and not on the floor.

Mold Chutes are made of durable plastic and are of rugged construction. The inserted hard PVC lining in the bottom is held in place with nylon screws that protect even the most delicate molding. The material used in the construction will not absorb oil or grease and is abrasion, puncture, and tear resistant. Each **Mold Chute** is easily cleaned using simple household cleaners. There are no concertina folds to trap moldings or dirt. **Mold Chutes** come in 18 standard sizes with in-line or side exit delivery chutes. We also offer Tapered Mold Skirts when you don't need a chute.

Mold Shields are crystal clear plastic curtains which allows you to observe your molding area, and monitor your parts while production is in progress. As the mold opens and closes the **Mold Shield** correspondingly unwinds and recoils itself with each press cycle. Since **Mold Shields** are easily attached and removed as necessary, they can be quickly moved from press to press to meet changing production demands.

Some Benefits of Chutes and Shields:-

- Reduce Scrap
- Eliminate Contamination
- Increase Profits
- Easy Installation
- Quick Access to the Mold
- Movable to Other Presses

If one of our standard size chutes, skirts or shields won't meet your needs, or if you require a special tapered mold skirt, we will make them to any size you want. For vertical presses, where you might need to enclose 3 sides of your mold, we have special kits to meet your application. Phone our technical support for your free installation guide and user notes.

Mold Shields & Chutes™ are manufactured by Industrial Protective Shields Ltd.

Mold Chutes are available in standard sizes from 8" to 24" mold width. Special sizes are available for a small surcharge and can be ready in 2 weeks from receipt of order.

Mold shields are available in 8 standard sizes 8"x24", 12"x24", 16"x24", 20"x24", 24"x24", 32"x24", 40"x24" and 48"x24". For larger applications shields can be stacked one above the other. Custom sizes are also available with a surcharge.

Installation Easy to install
 Easy to remove
 Simple assembly of hardware and magnets is required
 Magnet with locating post is positioned on the outer edge of the mold
 Mold Chutes attach to the magnet using Velcro straps
 Shield Attachment Handle latches onto the magnet locating post
 For larger vertical sizes shields can be stacked one on top of the other
 Install a spacer between the magnet and shield when using an air blast during mold opening

**Chute Kit
